

For horizontally based patterns such as spirals or vertical stripes the number of colors used must divide evenly into 8, color sequences that do not divide evenly into 8 will result in an asymmetric color pattern.

Simple artwork such as stars or special cuts may be placed anywhere in Panels A-O and should repeat evenly around the balloon.

A parachute top is standard. This is constructed from 8 gores that radiate from a center patch. Each gore contains two panels.

There is no extra charge for changes of fabric color at any of the lines shown on the chart if the colors are from the standard Cameron range, which is listed below.

The standard Cameron Nomex™ colors are also listed below and should only be used in the Nomex™ base panel and Scoop.
